Patrick Hoffman, LA	Michael Travis, Travis Peterson Environmental Consulting, Inc.
Scott Pulice, Lounsbury Associates	
John Smith, Municipality of Anchorage, Project Management & Engineering (PM&E)	

### MEETING INFORMATION:

Meeting participants were greeted at the room entrance, given handouts, and asked to make a nametag and place a sticker on an aerial photo of the corridor to mark their property or business. They were checked on a list of businesses and property owners and picked up a lunch to take to their seat at tables in the meeting room. Each table had a set of large aerial photos of the corridor as well as a plan showing crash numbers and locations.

The meeting began with an introduction of project team members present and participants were encouraged to introduce themselves to others sitting at the same table.

A PowerPoint presentation stated goals of the meeting, goals of the project, project background, and outlining some of the challenges and opportunities the project presents.

Then the workshop portion of the meeting began. Each table as a group was asked to consider the 5 questions on the back of the agenda and write their ideas on half-sheets of paper, 1 idea per

sheet. These were collected by the project team and grouped by themes on sticky walls mounted around the room.

At the end of the workshop, the ideas on the walls were reviewed for the entire group by the facilitator so everyone could share awareness of all the ideas and of the common themes represented.

The meeting ended with an invitation for participants to continue their involvement with the project by attending the public meeting November 10, and/or by volunteering for a Citizens' Advisory Group to be formed for the project.

The ideas captured during the workshop follow. Information between [ ] added for clarity, numbers between parenthesis ( ) denote multiple comments.

### **Comments on Aesthetics**

- Remove hedges
- [Include] urban landscaping (plant material)
- [Develop a] pocket park at Arctic (north east corner)
- Beautification
