

Fireweed Lane Reconstruction New Seward Highway to Spenard Road

The Municipality of Anchorage (MOA) and the Alaska Department of Transportation & Public Facilities (ADOT&PF) are about to begin planning and engineering work for changes to Fireweed Lane. This is a new project, a new start at improving the safety, function, and even the look of the entire length of Fireweed.

There will be many opportunities for members of the public, nearby residents and local businesses to become involved with the project. In addition to public meetings and updates at local community councils, the project team plans to have a Citizens Advisory Group for in-depth discussion, and meetings for Fireweed business owners and managers that address their particular concerns. A project web site will keep current information available at all times.

We hope you will help us make Fireweed Lane a safe and pleasant place to drive, walk, bike or catch a bus.
